

KIDS Sunscreen

Problem:

It's a beautiful sunny day, the children are anxious to go outside for recess, and you're saddled with the task of matching 40 different bottles of sunscreen to 40 different children. Monitoring each child to make sure he/she gets sunscreen applied correctly can also cut further into that precious recess time.

Solution:

Easy! Just have all of the children line up in front of Rocky Mountain's pump dispensing system, apply, and send them out to play!

Benefit:

No more digging through boxes of several different bottles of sunscreen with each child's name. You'll save time and energy with our unique and convenient sunscreen dispensing systems.

Save by the Gallon!

Cost Effective Example:

- 1/8 oz. of SPF 15 cost \$.07 per application.
- X 2 applications per day = \$.14
- X 20 days per month = \$2.80
- You can add a \$3.00 monthly sunscreen charge and cover this cost completely.

Colorado State Child Care Regulations

#62 D: Sun Protection

It's important to be aware of the child care regulations in your state concerning sun protection and the application of sunscreen on children. For your reference, the Colorado State child care rules and regulations are listed below:

1. The center must obtain the parent or guardian's written authorization and instructions for applying sunscreen to their children's exposed skin prior to outside play. A doctor's permission is not needed to use sunscreen at the center.
2. When supplied for an individual child, the sunscreen must be labeled with the child's first and last name.
3. If sunscreen is provided by the center, parents must be notified in advance, in writing, of the type of sunscreen the center will use.
4. Children over 4 years of age may apply sunscreen to themselves under the direct supervision of a staff member.

While not mentioned specifically in most child care regulations, the liability of a severe sunburn may be considered neglect by Child Protection Services.
